LeetCode

## EDUCATION

Galgotias College of Engineering and Technology

June 2026

B.Tech - CGPA - 7.6

Greater Noida, Uttar Pradesh

## COURSE WORK

- Data Structures & Algorithms
- Web Development
- Operating Systems
- Database Management System
- OOPS Concept
- Systems Design

## TECHNICAL SKILLS

**Languages:** JavaScript/TypeScript, Java, C, HTML, CSS

**Technologies/Frameworks:** React, Tailwind, Vite, Redux, Node.js, Express.js, RESTful APIs, JWT Auth, WebSocket, Firebase, MongoDB, MySQL

**Other:** SEO Optimization, CI/CD using Git, GitHub, Postman

## PROJECTS

Artifex | React, TailwindCSS, Express, Firebase, Razorpay, Node.js

June 2023

- Architected a full-stack web application integrating art and technology, facilitating user access and ordering of custom sketches
- Integrated Firebase Auth, Firestore, and Express.js, boosting backend efficiency.
- Implemented Razorpay for payment processing, boosting successful transactions by 80%.
- Built scalable Node.js APIs for real-time order tracking and CRUD operations.
- Automated email/order updates via Nodemailer and logistics APIs, improving customer engagement and reducing manual effort.

Portfolio Website | React, TailwindCSS, Vite, Node.js

May 2024

- Built a personal portfolio website to showcase creative work and technical skills, attracting 3x more profile views.
- Designed a modern, responsive UI for seamless experience across all devices.
- Integrated SEO best practices and analytics, increasing visibility and engagement by 60%.
- Enhanced portfolio performance and adaptability for various devices and screens, making it accessible across multiple devices and screen sizes.

## EXPERIENCE

WeAnalyz Technologies

Aug 2025 – Present

React Intern

- Engineered and integrated REST APIs to bridge backend and frontend, enabling seamless real-time data exchange.
- Enhanced frontend logic and UI functionalities, improving responsiveness and user experience.
- Optimized application performance by reducing redundant API calls (cutting 25% network overhead) and converting images to modern formats (WebP), reducing load time by 30%.
- Collaborated in agile sprints with developers and designers, contributing to feature development, code reviews, and debugging.

## CERTIFICATIONS

- GitHub Foundations
- Accenture Digital Skills: Artificial Intelligence
- Career Essentials in Software Development by Microsoft and LinkedIn
